Education

Indian Institute of Information Technology, Vadodara — August 2024 – 5th Sem
B.Tech in Computer Science and Engineering (CGPA: 7.76) — *Gandhinagar, Gujarat*

D.A.V. Public School, Kota — 2022-2023
Class XII (CBSE): 86%

Hackathon Experience

DA-IICT Hackathon — March 2025
Top 30 out of 1000+ Teams — *Gandhinagar, India*

- Developed a **Coastal Threat Alert** System to monitor and predict coastal hazards such as storm surges, cyclones, and abnormal tidal activity using real-time environmental data.
- Implemented machine learning models and geospatial analysis to detect high-risk coastal zones and generate early-warning alerts for vulnerable regions.
- Designed an interactive web dashboard for real-time visualization of threat levels, location-based alerts, historical trend analysis, and emergency notifications.

Projects

AlgoVerse (Full Stack) | HTML, CSS, JavaScript, Canvas API, JWT — March 2025

- Developed a full-stack algorithm visualization platform.
- Built backend server in JavaScript with authentication (Login/Signup) and execution history tracking.
- Designed PostgreSQL schema to manage user credentials and algorithm execution metadata.
- Enabled time-complexity comparison and real-time visual feedback through color-based transitions.

DSA-Judge | Next.js, Express.js, Redis, BullMQ, PostgreSQL, Docker | Repo Link — April 2026

- Engineered an asynchronous code-evaluation pipeline utilizing Express.js, BullMQ, and Redis to decouple submission queuing from the main HTTP cycle, ensuring non-blocking performance for concurrent users.
- Developed a scalable frontend using Next.js and TypeScript, integrating Monaco Editor and a robust verdict polling mechanism to seamlessly render real-time asynchronous execution states.
- Designed a structured relational database schema with Prisma ORM and PostgreSQL to efficiently manage user enrollments, topic-wise problem sets, and granular access controls for hints and editorials.
- Architected a reproducible development environment by configuring multi-container orchestration using Docker Compose to unify the database, cache, backend, and worker layers.

Achievements

- Semifinalist in **Hackout Hackathon** with 1 lakh+ participants.
- Solved **350+** Data Structures and Algorithms problems across LeetCode, Codeforces, GFG, and CodeChef.
- LeetCode Rating: 1474 (Max: 1518) | CodeChef Rating: 1131 (Max: 1174).

Technical Skills

Languages & DSA: C, C++, Java, Python, JavaScript – Solved 350+ algorithmic problems.

Web Development: Node.js, React, Next.js, HTML, CSS, TailwindCSS, Material UI, Flask

ML & AI: Scikit-learn, TensorFlow, Keras, PyTorch, OpenCV, Matplotlib, Pandas, NumPy

Tools & Databases: GitHub, VS Code, Postman, MySQL, MongoDB, PostgreSQL
